

09/780,696
Art Unit 3624
Docket no. 8771.00

1 - 29 (Cancelled)

30. (Previously presented) A self-service financial terminal comprising:

means for receiving a request from a wireless communication device; and
means for dispensing valuable media in response to a request received from a wireless communication device.

31. (Original) A terminal according to claim 30, further comprising means for enabling the terminal to be operable in a first mode in which a user may enter information using a user interface located on the terminal, and in a second mode in which a user may enter information using a portable user interface.

32. (Cancelled)

33. (Previously presented) A self service financial terminal comprising:

a transceiver which receives a request from a wireless communication device; and
a dispenser which dispenses valuable media in response to a request received from a wireless communication device.

34. (Previously presented) A method comprising:
receiving at a self-service financial terminal a request
from a wireless communication device; and
dispensing at the self-service terminal valuable media
in response to a request received from a wireless
communication device.

35. (Previously presented) A method according to claim 34,
further comprising enabling the terminal to be operable in a first
mode in which a user may enter information using a user interface
located on the terminal, and in a second mode in which a user may
enter information using a portable user interface.

36. (Previously presented) Self-service terminal according
to claim 30, wherein the terminal presents no keypad to a customer.

37. (Previously presented) Self-service terminal according
to claim 30, wherein the terminal presents no video display to a
customer.

38. (Previously presented) Self-service terminal according
to claim 36, wherein all communication between the portable
communication device and the terminal passes through a wireless
communication port on the terminal.

39. (Previously presented) Self-service terminal according to claim 36, wherein the valuable media comprise currency.

40. (Previously presented) Self-service terminal according to claim 36, wherein the valuable media comprise banknotes, telephone cards, or ski passes.

41. (Previously presented) Self-service terminal according to claim 30, wherein the valuable media comprise at least one medium of exchange.

42. (Previously presented) Self-service terminal according to claim 33, wherein the terminal presents no keypad to a customer.

43. (Previously presented) Self-service terminal according to claim 33, wherein the terminal presents no video display to a customer.

44. (Previously presented) Self-service terminal according to claim 42, wherein all communication between the portable communication device and the terminal passes through a wireless communication port on the terminal.

45. (Previously presented) Self-service terminal according

09/780,696
Art Unit 3624
Docket no. 8771.00

to claim 42, wherein the valuable media comprise currency.

46. (Previously presented) Self-service terminal according to claim 42, wherein the valuable media comprise banknotes, telephone cards, or ski passes.

47. (Previously presented) Self-service terminal according to claim 33, wherein the valuable media comprise at least one medium of exchange.

48. (Previously presented) Method according to claim 34, wherein the terminal presents no keypad to a customer.

49. (Previously presented) Method according to claim 34, wherein the terminal presents no video display to a customer.

50. (Previously presented) Method according to claim 48, wherein all communication between the portable communication device and the terminal passes through a wireless communication port on the terminal.

51. (Currently amended) ~~Method according to claim 48, wherein the valuable media comprise currency.~~

A method comprising:

receiving a request from a wireless communication device

09/780,696
Art Unit 3624
Docket no. 8771.00

at a self-service financial terminal, the terminal
i) serving to execute financial transactions
for customers; and
ii) lacking a keypad; and
dispensing currency at the self-service terminal, in
response to a request received from a wireless
communication device.

52. (Previously presented) Method according to claim 48, wherein the valuable media comprise banknotes, telephone cards, or ski passes.

53. (Previously presented) Method according to claim 34, wherein the valuable media comprise at least one medium of exchange.

54. (Currently amended) ~~Self Service Terminal, SST,~~
~~according to claim 30, wherein~~

- ~~i) the SST comprises an automated teller machine,~~
- ~~ii) the SST presents no keypad to a customer,~~
- ~~and~~
- ~~iii) the valuable media comprises currency.~~

An automated teller machine which

- a) comprises:

Art Unit 3624
Docket no. 8771.00

i) means for receiving a request
from a wireless communication
device; and

ii) means for dispensing currency
in response to a request received
from a wireless communication
device; and

b) lacks a keypad.

55. (Previously presented) SST according to claim 54,
wherein the SST presents no video display to the customer.

56. (Previously presented) SST according to claim 55,
wherein the wireless device displays one or more screens which
display options available in the ATM, including one or more cash
withdrawal options.
